SUMMARY

Full Stack Developer skilled in **React.js, Node.js, Express.js, and MongoDB**, focused on building responsive, high-performing web applications with clean UI/UX. Experienced in developing **REST APIs, authentication systems, role-based access control, and payment integrations**, with hands-on experience integrating real-time systems, GPS-based workflows, and OCR-assisted verification. Microsoft Certified in **AI-900, SC-900, and DP-900** with a strong foundation in cloud, security, and data fundamentals.

EDUCATION

Parul University	2023–2027
B.Tech in Computer Science & Engineering	CGPA: 7.54
UES School and Jr. College	2023
	66.67%
UES School	2021
	86%

SKILLS

Languages: Java, JavaScript (ES6+)

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Framer Motion, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Socket.IO, SMTP

Database & Testing: PostgreSQL, MongoDB Atlas, Mongoose ODM, SQL, Postman

Cloud & AI: Microsoft Azure, AI-900, SC-900, DP-900

Deployment / Tools: Git, GitHub, Vercel, Render, Netlify

Core CS: Data Structures & Algorithms, OOP, Computer Networks, Operating Systems

PROJECTS

Campus Canteen Hub | *React.js, Node.js, Express.js, MongoDB* | Live

- Built a full-stack food ordering platform with **JWT authentication, SMTP email OTP, RBAC, cart, orders, vendor management, and real-time order tracking**.
- Developed **RESTful APIs** for authentication, menu, cart, orders, vendor operations, payments, recommendations, and queue/ETA management.
- Engineered **personalized food recommendations** using purchase history, category/vendor preferences, popularity, ratings, and repeat purchases, along with a **smart vendor-wise order queue and dynamic ETA system**.
- Integrated **Razorpay payment verification** and deployed the application using **Vercel with MongoDB Atlas**, including production environment and CORS configuration.

HomeEase – Home Service Marketplace | *React.js, Node.js, Express.js, MongoDB* | Live

- Architected role-based Customer, Provider, and Admin workflows with **JWT authentication, secure API authorization, provider verification, and booking management**.
- Engineered **real-time booking status and chat** using Socket.IO with event-driven synchronization between customers and service providers.
- Implemented **Razorpay payment verification** with dynamic provider-configured site-visit fees and payment-driven booking confirmation.
- Built **GPS-based provider arrival detection** using live location tracking and Haversine geofencing for automated arrival verification.
- Developed **OCR-assisted provider verification** with document extraction, name consistency checks, experience and skill verification, and admin approval workflows.

CERTIFICATIONS

AI-900 (Microsoft Certified)

DP-900 (Microsoft Certified)

SC-900 (Microsoft Certified)

Computer Network (NPTEL)

ACHIEVEMENTS

- Earned Microsoft AI-900, SC-900, and DP-900 certifications, demonstrating proficiency in cloud, security, and data fundamentals.
- Led a team during a college hackathon and delivered a functional software prototype within the competition deadline.
